

# O-Ring Sizing Chart

Sizing Chart (above) - O-rings are shown in actual size. GSMoT stocks a variety of standard O-rings suitable for repairing SCUBA regulators, valves, and other equipment. Technicians should be aware that certain SCUBA equipment may require O-rings of special composition or durometers and substituting different O-rings of the same size may lead to serious malfunctions. Always check the manufacturer's specifications to be sure of the nature of the required O-rings. If in doubt, consult the Technical Support Dept. at 512-240-6644 or techsupport@global-mfg.com.
